## PROFESSIONAL SUMMARY

Detail-oriented SQA Engineer and Computer Science graduate experienced in functional, regression, and API testing and Playwright automation. Skilled in test case design, Bug Tracking ( Azure DevOps ), and SDLC/STLC..

## PROFESSIONAL EXPERIENCE

**Jr. SQA Engineer | TRAFiX LLC** Sept 2026 - Present

- Execute functional, regression, smoke, and exploratory testing to ensure release quality and system reliability.
- Design test scenarios and test cases from requirements; manage execution in Azure DevOps.
- Log, track, and verify defects through the bug lifecycle, collaborating with developers to ensure timely resolution.

**PPC Landing Page Developer | Freelance** Mid 2025 – Early 2026

- Delivered 100+ PPC landing pages with cross-browser and responsive testing before every handoff.

## EDUCATION

**FAST NUCES** 2022 — 2026

Bachelor of Science in Computer Science

## SKILLS

**SQA**

- Functional & Regression Testing
- Smoke & Exploratory Testing
- API Testing
- Test Case Design
- Defect Tracking & Reporting

**Tools & Platforms**

- Azure DevOps
- JIRA (AIOTests)
- Playwright (E2E Automation)
- Postman
- Git / GitHub
- Allure Reporting

**Programming Languages**

- C / C++ (OOP)
- Python
- JavaScript

**Web Development**

- HTML / CSS
- React.js
- Python (Flask)

**Backend & Databases**

- RESTful APIs
- MySQL
- Role-Based Authentication

## CERTIFICATIONS

- **API Testing Path (v12) by Postman Academy – Verification Link**
- **Introduction to Playwright by Test Automation University –** Verification Link

## SQA PROJECTS

**Playwright E2E Test Automation — Blood Donation System** Jun 2026

*Playwright · JavaScript · Allure Reporting*

- Built a 40-scenario Playwright (JavaScript) E2E suite covering positive and negative flows for a Flask web application.
- Validated login, registration, donor search, and admin workflows; produced Allure reports with screenshots.

## ACADEMIC PROJECTS

**CleanAI — AI-Powered Waste Classification (FYP)** Aug 2025 — May 2026

*React.js · Next.js · Python · YOLO · Flask*

- Built and deployed a YOLO-based waste classification MVP, iteratively improving real-world model accuracy.
- Built a responsive landing page, backend services, and admin dashboard, deployed on Vercel and Railway.
- Conducted pilot testing and executed unit, integration, smoke, and regression testing to validate end-to-end functionality.
